PRODUCT UNDER TEST

What's being tested? What are the business and experience goals of the product?

The disaster map is a mobile android app designed to let users view and report hazards in real-time. The experience goal is to ensure users are aware of hazards in the area of home or travel using an intuitive map-based interface.

TEST OBJECTIVES

What are the goals of the usability test? What specific questions will be answered? What hypotheses will be tested?

PARTICIPANTS

How many participants will be recruited? What are their key characteristics?

TEST TASKS

What are the test tasks?

RESPONSIBILITIES

Who is involved in the test and what are their responsibilities?

BUSINESS CASE

Why are we doing this test? What are the benefits? What are the risks of not testing?

The purpose of the test is to ensure the app is user friendly and intuitive whilst ensuring the app performs as expected. Allows developers to iron out any logic abnormalities before its release. Without testing, the app could go live with problems which will decrease the chances of being used

EQUIPMENT

What equipment is required? How will you record the data?

Android Studio Emulator will be used for testing the app.
Screen recording will be used to capture the tests.
Android profiler will evaluate performance

LOCATION & DATES

Where and when will the test take place? When and how will the results be shared?

PROCEDURE

What are the main steps in the test procedure?
